Introduction

Annually, the Maryland State Department of Education (MSDE) collects information on students with disabilities (ages 3-21) who reside in the State of Maryland. Until 2013, this child count was taken on the last Friday of October. In 2014, it began being taken on October 1. In order to be included in this count, a child must be identified as having a disability and receiving active special education services on October 1.

The Special Services Information System (SSIS) consists of two separate data collections. The first is the October 1 child count, a count of all students receiving special education services on October 1 of every school year. Data on students who have exited special education are collected on June 30 of every school year.

The SSIS database is used to compile information on Maryland students with disabilities. MSDE uses the SSIS database as:

- a source of information to meet planning, monitoring, and accounting responsibilities for special education;
- a recording and reporting tool for decisions made by public agencies; and an instrument for federal reporting requirements.
